Summary

- Over 5 years of experience in Frontend Development using React, with 4 years in Typescript
- Worked with various contractors, fostering adaptability across different technologies, teams, and methodologies
- Skilled in developing and maintaining high-performance web apps using modern technologies such as Node.js, Next.js, Redux, GraphQL, and React Testing Library
- Went above and beyond, with 87.5% of performance evaluations commending me for exceeding expectations

Experience

Distillery   Sep 2021 – Aug 2023

Senior Frontend Developer

- Volunteered and worked on Distillery's intranet, migrating an outdated Vue project to React, updating styles to align with the company's branding guidelines, and enhancing the user experience

Client: **X4Y**

A marketplace for unbranded content, where content creators can upload videos, maintain public profiles, and communicate with brands. Brands can browse, filter, view, and purchase ready-to-brand content, facilitating direct transactions and collaborations

- Developed their Full-Stack Next.js application from scratch with a small team, focusing on public profiles and content creator dashboards
- Utilized Supabase to authorize users through JSON Web Tokens (JWT)

Client: **Insight2Profit**

Consulting firm that partners with companies to identify and implement profit improvement strategies through different solutions, including custom CPQ (Configure, Price, Quote) software that allows for the creation and management of dynamic quotations and discount approvals

- Decomposed a monolithic repository into multiple individual repositories, resulting in easier maintenance and faster build times
- Optimized their heavily form-based applications by integrating react-form to simplify and manage form state and validation within React applications
- Utilized react-query to manage server state efficiently, significantly improving the application's performance thanks to its caching

Globant

Mid-Senior Frontend Developer   May 2021 – Sep 2021

Client: **American Century Investments**

An asset management firm focused on delivering investment performance through different solutions

- Built and maintained an internal Atomic Design-based React Components library with Typescript, Storybook, Material UI, Styled Components, and React Testing Library

- Authored documentation for components and code-reviewed new submissions
- Increased test coverage by 7% (to over 97%) by suggesting and implementing Git hooks, which reminded developers to write and review tests before committing code

Frontend Developer   Apr 2020 - May 2021
Client: **American Century Investments**

- Revamped their investment portfolio builder by updating styles, incorporating graph charts, and enabling asset filtering
- Developed a news blog using Next.js, Contentful CMS, and GraphQL
- Secured 3rd place out of 41 submitted projects on an internal Hackathon
- Praised for clear communication and excellent English skills

Junior Frontend Developer   May 2019 - Apr 2020
Client: **American Express**
An American bank holding company and multinational financial services corporation that specializes in payment cards

- Collaborated in a multi-disciplinary international team, building new components, fixing bugs, and creating new routes for their Car Rental search app using React and Redux
- Volunteered as the first team member to learn and integrate automated end-to-end testing, improving test coverage and reducing QA workload
- Co-led an informal English Conversation Club, which expanded and gained official status

Hootsuite   Jan 2019 - May 2019
Senior Customer Support Advocate (Billing)
- Worked in the Customer Support industry as a Bilingual employee for two years while learning web development in my free time
- Won Advocate of the Year (2019) and traveled to the European offices to share best practices for effective customer engagement

Education

Bachelor's Degree in Computer Science   2020 - 2026
University of the People

Fullstack Web Developer   2018 - 2019
Ironhack
